Independently Certified to Major International Safety Standards

- Meets International Safety Standards
- ✓ Australian/NZ Standard AS/NZS 2210.3
- ✓ American Standard ASTM F2413
- ✓ European Standard EN ISO20345

Anti-Static boots: THE FACTS.

Boots with Anti-Static properties are designed to reduce the build up of excess static electricity by conducting body charge to the ground. This offers a level of protection against ignition hazards such as flammable materials and gases. They also maintain a sufficiently high level of resistance to protect the wearer from hazards due to live electrical circuits. Under Australian and New Zealand Safety Footwear Standards, this footwear is marked AS/NZS 2210.3 Class 1 A on the standards label inside the footwear, or S1, S2 and S3 on the label.
